

IV Drip Therapy at THE LAB

At THE LAB, we offer a curated selection of IV infusions designed to support your body's unique needs—whether you're looking to boost energy, enhance skin health, support immunity, or recover from fatigue.

Your journey begins with a personalised consultation, where you'll meet with our IV Nurse and a Pharmacist. Together, we'll assess your health, lifestyle, and goals to determine the most suitable infusion—or customise one tailored specifically to you.

To ensure the safety and effectiveness of your treatment, we generally review your most recent blood test results. If needed, we may also perform a blood test prior to your infusion to confirm you're in the right condition to proceed.

Every infusion is freshly compounded on-site by our pharmacy team, guaranteeing the highest standards of quality, sterility, and care.

HOW IT WORKS?

STEP 01

Consultation

Meet with our Health practitioners to discuss your goals.

STEP 02

Customisation

Choose from our pre-designed infusions or create your own.

STEP 03

Preparation

Your infusion is freshly compounded by our on-site pharmacy team.

STEP 04

Infusion Session

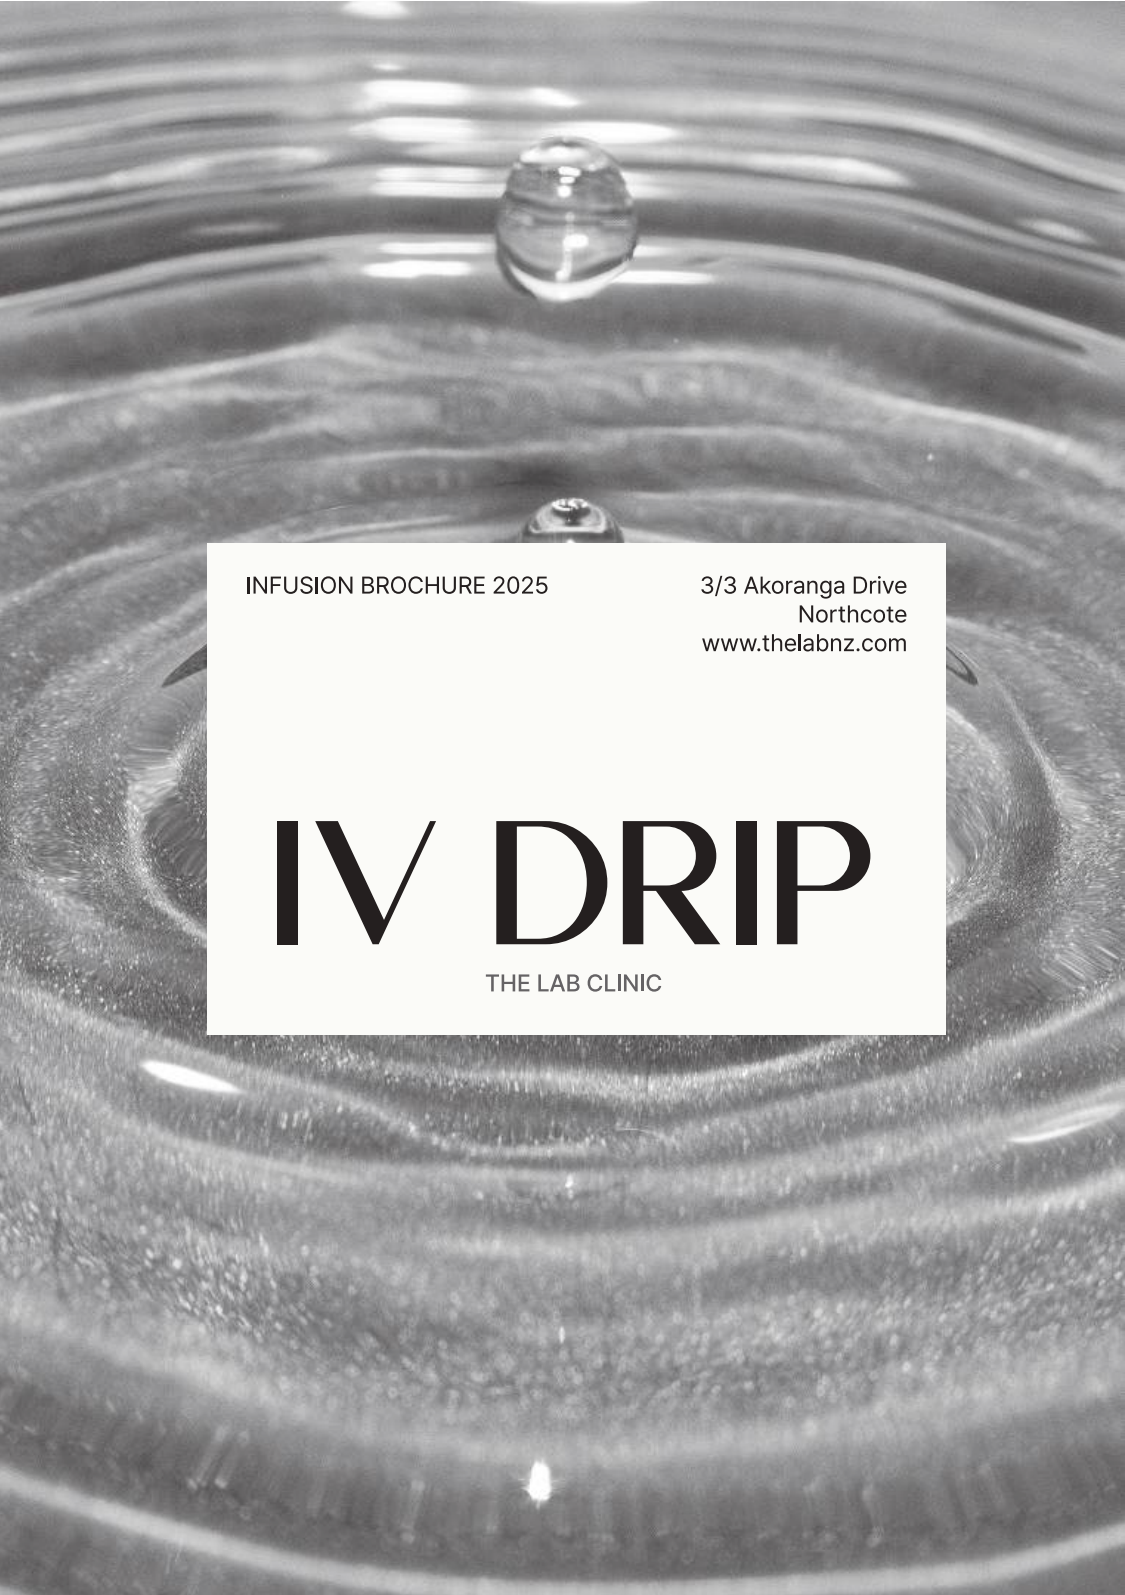

Relax in our treatment lounge as your tailored IV drip is administered.

*To ensure the safety and effectiveness of your treatment, we generally review your most recent blood test results. If needed, we may also perform a blood test prior to your infusion
